this is the fifth edition of a popular highly readable primer in obstetrics and gynaecology it has been thoroughly updated and reconfigured to key into the new undergraduate curriculum n o g devised by the royal college of obstetrics and gynaecology highly illustrated throughout essential information points at the end of chapters case histories throughout practical procedures boxes throughout alert warnings or advice and tick guidance or definitions boxes throughout new editor professor sabaratnam arulkumaran now a multi authored text written by eminent experts from across the specialty book entirely restructured to reflect the national undergraduate curriculum in obstetrics and gynaecology two new appendices principles of perioperative care and governance audit and research over 100 self assessment mcqs at the end of the book

this clinician s textbook examines the expanded role of obstetricians and gynaecologists in changing from organ healing and delivering babies to the comprehensive health care of the whole woman it describes a multiple role for the obstetrician gynaecologist as team leader in reproductive health specialist in gynaecologic disease primary health care provider and social advocate for women s health it contains 22 chapters on these topics covering the future of the professions of obstetrics and gynaecology in providing integrated and comprehensive health care for women

illustrated throughout this textbook is ideal for medical students it aims to help them master the essentials of the subject during

their short clinical attachment only the core must know information is included

this is the essential textbook for students of obstetrics and gynaecology as well as women s health more generally thoroughly modern in approach it covers clinical topics and surgical procedures as well as providing detailed commentary on the contemporary social psychological and economic issues that effect women s health many authors who are the acknowledged leaders in their respective research field have contributed specific sections to address women s mental health genetics prescribing for women health promotion hormones throughout the life cycle psychological and behavioural issues

the aim of this book is to provide a straightforward summary of the knowledge required for preliminary examinations in specialist obstetrics and gynaecology the first part of the examination for membership of the royal college of obstetricians and gynaecologists would be a good example thus the field covered is that of the basic sciences anatomy physiology biochemistry etc as applied to human reproduction most examinations of this type are based on multiple choice questions mcq no apology is made for the fact that the present book addresses the sort of fact which lends itself to testing by this approach there is no discussion of speculative or contentious areas no account of present or future research and no references excellent books are available which treat the topic in a much fuller and more discursive manner and the present volume does not seek to emulate them readers will be aware that even apparently immutable facts are subject to occasional revision we have attempted to present the state of the art most of the material is generally if not universally accepted a particular problem arises with numerical information

the second edition of this textbook is an essential revision aid for trainees preparing for membership of the royal college of obstetricians and gynaecologists mrcog examinations comprising nearly 1000 pages the text has been fully updated and is in line with the current syllabus and guidelines as recommended by the national institute for clinical excellence nice and the royal college of obstetricians and gynaecologists rcog the book is divided into three main sections general obstetrics gynaecology the first

section general provides an overview of the principles of clinical practice and surgery the obstetrics and gynaecology sections are further subdivided with obstetrics covering the antenatal period disorders during pregnancy complications in different stages of pregnancy intra and post partum delivery and the newborn and gynaecology covering general gynaecology menstruation abnormalities reproductive medicine urogynaecological and pelvic abnormalities gynaecological oncology lower genital tract problems and contraception numerous clinical photographs flowcharts tables and boxes further enhance the invaluable text key points second edition of practical revision aid for trainees preparing for mrcog examinations text in line with current syllabus and guidelines recommended by nice and rcog highly illustrated with clinical photographs flowcharts tables and boxes previous edition 9789386322876 published in 2017
